FLASHPOINT

THREAT RESPONSE & READINESS SUBSCRIPTION

When an organization is targeted by ransomware or cyber extortion, it must quickly determine the extent of the attack, determine the response plan, and mitigate the impact. Flashpoint Professional Services (FPS) offers a Threat Response & Readiness Subscription that helps companies prepare for, as well as, quickly assess and respond to a ransomware or cyber extortion attack.

SERVICE OVERVIEW:

Flashpoint Threat Readiness & Response Subscription is a natural extension of Business Risk Intelligence (BRI), which provides organizations with a decision advantage over threats and adversaries. Our data collections, threat actor research, and threat actor engagement are uniquely provided by robust technology, unmatched multilingual intelligence analyst expertise, and a highly experienced FPS team.

Flashpoint provides research to organizations impacted by attacks, as well as directly engages with threat actors; part of this engagement may also include providing access to cryptocurrency.

RESPONSE:

Ransomware and extortion are responsible for billions of dollars in losses each year across industries, and while some high-profile attacks and success stories reach the mainstream, they are a tiny percentage of the true number of incidents and actual payouts made to adversaries. Flashpoint Threat Response & Readiness Subscription handles not only emergency situations, but also helps organizations prepare before a threat is imminent. In a response situation, Flashpoint helps organizations quickly acquire cryptocurrency and also engage with the threat actor to determine appropriate mitigation.

READINESS:

Readiness includes a ransomware workshop, tabletop exercises (TTX), pre-negotiated FPS rates and engagement hours. The workshop educates customer teams on ransomware, how it works, why organizations become infected, the evolution of this threat, profiles of attackers, cryptocurrency and issues related to payments, and other details relevant to the customer organization or vertical. The TTX will bring together critical stakeholders to discuss simulated scenarios, assess the efficacy of current plans, ensure clarification on roles and responsibilities, and improve coordination to help better mitigate future attacks.

In both Response and Readiness deliverables, Flashpoint works with organizations to develop contingencies in the event of an attack, including establishing a process to ensure payments can be made securely and quickly.

SUBSCRIPTION ALSO INCLUDES:

- **Access to cryptocurrency:** This engagement enables procurement of cryptocurrency on behalf of your organization.

- **One half-day ransomware workshop:** An interactive, hands-on workshop, educating your team about ransomware attacks, as well as additional information relevant to your organization or vertical.

- **One half-day TTX:** Access to TTX which simulates real-world scenarios, enabling your team to prepare and mitigate risk for a potential event.

- **FPS hours at a reduced rate:** Service includes the option to pre-purchase hours for additional services from FPS at a reduced rate.

KEY BENEFITS:

- Develop contingencies in the event of an attack, including establishing a process to ensure payments can be made securely and quickly.

- Prepare in advance of an incident with training and education, and assist in rapidly acquiring cryptocurrency in the event of immediate attack.

- Access to Flashpoint subject-matter experts (SMEs), providing the necessary intelligence to support a number of critical assessments, starting with the determination of whether an attack is a legitimate ransomware or extortion situation.

- Determine the credibility of an attacker's claims, as well as investigate the history of the digital wallet accepting the ransom payment.

FLASHPOINT PROFESSIONAL SERVICES:

Flashpoint delivers Business Risk Intelligence (BRI) to empower business units and functions across organizations with a decision advantage over threats and adversaries. The company's sophisticated technology and human-powered analysis enable enterprises and public sector organizations globally to bolster cybersecurity, confront fraud, detect insider threats, enhance physical security, assess M&A opportunities, and address vendor risk and supply chain integrity.

ABOUT FLASHPOINT

Flashpoint delivers Business Risk Intelligence (BRI) to empower organizations worldwide with meaningful intelligence and information that combats threats and adversaries. The company's sophisticated technology, advanced data collections, and human-powered analysis uniquely enables large enterprises and the public sector to bolster cybersecurity, confront fraud, detect insider threats and build insider threat programs, enhance physical security, improve executive protection, and address vendor risk and supply chain integrity.
